---

## Summary

**Front End Engineer with 4+ years of experience** building high-performance, SEO-optimized web applications using React, Redux Toolkit, Next.js, and vanilla JavaScript. At Neo Wealth, I led real-time dashboards, smart analytics, and dynamic reporting initiatives—driving performance gains, boosting engagement, and mentoring cross-functional teams to deliver scalable, user-centric solutions.

## Experience

### SDE-2 Frontend

Neo Wealth And Asset Management • Andheri

01/2023 - 02/2025

- **Built a real-time portfolio dashboard** using React, Redux Toolkit, React-Router, Shadcn ui to deliver live snapshots of investment value, asset allocation, and performance metrics for 10,000+ clients, eliminating spreadsheet juggling and reducing data-refresh friction by 80%.
- **Developed smart analytics features**—including trend charts, exposure heatmaps, and diversification indicators—integrated with D3.js and NivoCharts, enabling users to benchmark against market indices and adapt strategies; adoption increased data-driven decisions by 60%.
- **Engineered a dynamic reporting engine** that generates on-demand PDF and Excel reports for asset breakdowns, transaction summaries, and performance KPIs; report generation time dropped from 15 sec to under 3 sec.
- **Integrated a personalized news feed** within the SPA, leveraging server-side APIs and client-side filtering to surface market and economic events contextualized to each user's holdings, boosting in-app engagement by 45%.
- **Optimized frontend performance and accessibility** reduced initial bundle size by 35% through route-based code splitting and tree-shaking, boosted Lighthouse score from 68 to 93
- **Modernized the codebase** by migrating from Context API to Redux Toolkit with Redux Thunk and establishing ESLint/Prettier standards for a 5-engineer team.

**Technologies & Tools:** React, Redux Toolkit, React-Router, D3.js, Recharts, NivoCharts, Jest, Lighthouse, CSS-in-JS, Git.

### React Js Developer

Homebazaar Services Pvt Ltd • Vashi

02/2022 - 12/2022

- **Created custom React Hooks** to encapsulate business logic across 15+ components, enforcing DRY principles and reducing duplicate code by 70%.
- **Implemented Static Site Generation (SSG) and Server-Side Rendering (SSR)** strategies with Next.js to improve SEO and initial load performance, driving a 40% uplift in organic search traffic
- **Built a folder-based routing structure** with Next.js Pages Router, defining dynamic and nested routes via file-system conventions to support 100+ pages and streamline navigation

- **Managed source code using Git and GitLab**, coordinating CI/CD pipelines, branch workflows, and merge request reviews across a 4-engineer team to ensure robust, on-schedule releases
- **Developed dynamic Property Detail pages** with Next.js dynamic routing and pre-rendered content via `getStaticProps`, generating 500+ static pages at build time and reducing page load times by 60%

**Technologies & Tools:** Next.js (SSG, SSR, Pages Router), MUI, React (Hooks, Custom Hooks), Git, GitLab.

## Associate Software Developer

CS Infocomm Pvt Ltd • Saki Naka

08/2021 - 02/2022

- Created a chatbot dashboard using Ant Design components, delivering responsive UI layouts.
- Integrated RESTful APIs into Next.js pages via `getServerSideProps` and client-side fetch
- Implemented Next.js Static Site Generation (SSG) and Server-Side Rendering (SSR) strategies to boost SEO, resulting in a 25 % uplift in organic search visits.
- Collaborated within a 4-member Scrum team using Git and GitLab CI/CD, participating in code reviews and merge requests to maintain code quality and accelerate release cycles

**Technologies & Tools:** Next.js, React, Ant Design, JavaScript (ES6+), Git

## Web Developer

Jethi Tech Solutions • Remote

12/2020 - 07/2021

- **Built modular UI components** with semantic HTML5, CSS3, and vanilla JavaScript —navigation bars, cards, modals—to enforce DRY principles and cut markup duplication by ~60%.
- **Developed custom JS utilities** for data fetching (Fetch API + Promises), form validation, and DOM updates, centralizing common logic and improving maintainability.
- **Structured CSS with BEM methodology and CSS variables**, creating scoped, scalable stylesheets that eliminated naming collisions and trimmed overall CSS size.
- **Ensured responsive, accessible layouts** using CSS Flexbox, Grid, media queries

**Technologies & Tools:** HTML5, CSS3 (Flexbox, Grid, BEM), JavaScript (ES6+), Fetch API, Git, GitLab.

---

## Skills

Languages: HTML, CSS, JavaScript, TypeScript (Learning), Technologies: React, Redux Toolkit, Next.js, React Query

---

## Education

### B.E Computer Science

Datta Meghe College Of Engineering Airoli

11/2020

CGPA 7.21

---

## Awards

2 times Employee of the month at Homebazaar Services Pvt Ltd
